1. Structure

2. Dimensions

3. Technic Data

Model	PT-25V
Inner diameter	Dn25
Outer diameter	Dn32
Negative pressure	1200Pa
Gross weight	60g

4. Installation

- Please check any damage before installation and use.
- This product is made of plastic, please do not store or use it under high temperature conditions, such as near fire sources.
- Please pay attention to the inflow and outflow direction of the condensate trap and install it vertically.
- An inspection port is set near the condensate trap for easy maintenance, inspection and cleaning.
- Please close the lid completely during normal use. Do not use organic compounds such as acetone thinner when cleaning.
- If it is connected to a machine that discharges high-temperature water, take care to prevent burns.

5. Maintenance

- ① Unscrew the top body counterclockwise
- ② Cleaning the internal parts
- ③ Reassembling internal parts
- ④ Please make sure that there is no water leakage when the lid is completely closed.

⚠ Warning!

This product cannot completely prevent air reflux

6. Application(For reference only)
